MISSION OF SECTION:
The mission of the Office of Information Services (OIS) is to leverage the most effective information technologies (IT) available to achieve the California Air Resources Board's (CARB) program goals. The mission includes ensuring that such technologies are professionally managed, properly maintained and efficiently used.

The Systems Development and Support Branch (SDSB) is responsible for the development and ongoing support of IT solutions to CARB’s complex business, scientific, and engineering program needs. The Branch implements solutions, and supports ongoing operations, maintenance, and hosting services necessary to sustain CARB business applications and systems through their business life.

Within SDSB, the Application Development Unit (ADU) develops, implements, and maintains many of CARB’s most complex information systems. These systems capture, process, report, and manage collected air quality data. These systems capture, process, report, and manage collected air quality data. They also register and track the performance of regulated parties whose businesses affect air quality. Unit staff analyze business requirements, develop and test applications, and integrate database systems with data acquisition, data retrieval, data analysis, and data presentation programs. Unit staff maintain and enhance implemented applications and databases, and train application owners and end users.

CONCEPT OF POSITION:
Under general direction of the Information Technology Manager I, the Information Technology Specialist II (IT Specialist II) provides technical expertise to develop and support of complex CARB business applications. In collaboration with project managers, business owners, subject matter experts, and co-developers (state and contracted), the IT Specialist II works on a variety of information technology (IT) activities that span the full software development lifecycle. The IT Specialist II’s professionalism and software expertise leads to superior customer satisfaction and delivers products and services that meet or exceed the customer's expectations. The IT Specialist II provides technical expertise and support for a variety of IT activities, such as, but not limited to, development of software lifecycle processes and standards, updates to the Board's technical architecture, and technical support in the development of highly complex IT feasibility studies, IT procurements, and IT acquisition plans. The incumbent must communicate effectively, be well-organized, and be able to track and complete multiple assignments concurrently, while establishing and maintaining constructive professional relationships with management, customers, peers and vendors. The incumbent maintains and processes confidential personnel data.

INFORMATION TECHNOLOGY DOMAINS:
☐ Business Technology Management
