☐ Business Technology Management ☐ IT Project Management ☐ Client Services						
□ Information Security Engineering □ Software Engineering □ System Engineering						

Under the general direction of the Information Technology (IT) Manager I, the IT Specialist (ITS) II performs a majority of his/her duties in the Software Engineering domain. The ITS II possesses technical expertise and leads the development of data strategies, data analysis, and research in the use of Business Intelligence (BI) tools, and establishment of BI standards and practices. The incumbent provides vision and leadership for the continued development of the departmental BI Data Warehouse. Duties include formulating and leading highly complex planning and implementation strategies for the Data Warehouse. The incumbent is responsible for providing leadership and guidance for maintaining and managing the data infrastructure that supports all BI tools/applications and self-service activities and ensuring that the goal of building reports, dashboards, and fulfilling data requests is fully-integrated with EDD data warehouse is achieved. This means creating a "data refinery" at EDD that collects, integrates, and manages data assets that data analysts can query. In addition, the incumbent is the lead responsible for securing sensitive data; monitoring the flow of data through the systems; ensuring data freshness; coordinating the response to exceptional conditions, such as errors in incoming datasets; and

oversee top-level configuration management of outward-facing system components (defining users, organizations, categories, etc.).

The incumbent represents the interest of EDD's program customers, department goals, and IT Branch directives in developing new BI capabilities which lead to cost savings, improved analytical decision making and faster response times for external and internal information requests.

The incumbent contributes toward the growth of the IT Branch into a customer-focused service organization by following Branch cultural principles and by providing constructive feedback to others within the Branch regarding the application of those principles.

3. DUTIES AND RESPONSIBILITIES OF POSITION (continued)

6: DOTTES AND REST STORBLETTIES STIT SOFTIST (continued)				
Percentage of Duties	Essential Functions			
45%	Serve as the Lead in the DWG to develop and implement Extract, Transfer, and Load (ETL) jobs for data conversion ensuring that: data is converted into an appropriate format that fits the destination database, data is transferred correctly, data works in the new destination database, data retains its quality, and data consistency is maintained at all times across all systems using that particular data. Ensure business engagement and quality of data conversion. Implement data standards identified by the enterprise data architects. Ensure that proper data profiling and data cleansing procedures are in place so that the original data is of high quality. Identify and develop data cleansing programs based on data fallout from mock conversion runs and data quality business rules. Execute data cleansing programs in production and staging environments as appropriate. Following data conversion, ensure that the duplicate master data is eliminated, reducing the risk of incorrect transactions and unreliable reports.			
30%	Provides technical expertise and leadership for ensuring IT Branch strategic direction is followed, developing implementation strategies and functional processes for the DWG, and identifying and enforcing security practices to ensure the safety of confidential information for all the department's branches. Advises and consults with management and executive staff as needed throughout the course of building and enhancing the BI data warehouse. Performs a variety of more complex technical analysis and conducts			

- independent research. Maintains knowledge in current BI products use and support, and researches potential future products. Leads and provides BI technical assistance and training for all the department's branches. Advises customers on most appropriate tool use for various scenarios.
- Secure sensitive data; monitoring the flow of data through the systems; ensuring data 10% freshness; coordinating the response to exceptional conditions, such as errors in incoming datasets; and oversee top-level configuration management of outward-facing system components (defining users, organizations, categories, etc.). Participate and collaborate in data architecture, data governance, data infrastructure, and data innovation efforts. Provide customer support in the use of Enterprise BI tools utilized in the BI data warehouse. Lead BI tools/software upgrade efforts. Apply maintenance and participate in system configuration efforts. Manage metadata for various deployments supporting BI developers. Lead in the creation and maintenance for all business intelligence data process
- Works collaboratively with the IT Branch management, internal and external EDD 10% customers, briefs and advises the manager, exercises a high degree of initiative, independence of action and originality, and demonstrates tact and good judgment. S/he must be able to communicate effectively in order to develop and maintain effective and cooperative working relationships. The incumbent must be able to adapt easily to changing priorities and maintain consistent, predictable attendance in the performance of these specific functions.
